

Internship Katapult Future Fest

Katapult Future Fest is looking for eager and curious interns to help execute the third Katapult Future Fest in Oslo on May 14-16, 2019. The position is a part time (50% FTE) temporary internship for a contractual period that starts as soon as possible and lasts through the end of May 2019.

With experience in events, you are proactive and hands-on, taking ownership and execution on tasks. You are outgoing and engaging, as well as a multi-tasker, who works well in a fast-paced environment and handling a wide variety of tasks and responsibility. You are passionate and curious about technology and our future society and motivated by the opportunity to drive positive societal change.

Katapult Future Fest is an output driven festival focusing on how exponential technologies and impact investing can create a better future society for all. Katapult Future Fest serves as a global community and platform for action, challenging investors, startups, and thought-leaders to collaborate towards reaching and transcending the UN SDGs. The initiative was founded by Nordic Impact / Katapult World, a company that invests in tech startups with a mission to have a positive impact on society.

More About Katapult World

Vision: A world in which all humans thrive

Mission: Make impact investing mainstream and mobilize all capital and businesses to deliver positive impact, using exponential technologies as a tool to scale businesses solving the world's greatest challenges.

We invest and support early stage impact tech startups, funds and projects, with a mission to solve the world's most pressing problems through the use of exponential technologies. We are creating a movement that other investors are following. We lead by example. We drive many initiatives that build the impact investing field and attract new capital; including numerous events both in our main area of influence in the Nordics and further afield across the globe. We are working on catalyzing HNWI, family offices and foundation capital into impact investing by both giving them opportunities to co-invest and by offering support and education.

Technology can be a great force for good, but it can also cause great harm. As the world adopts ever more transformative tech, we believe that maximizing the chance of good outcomes requires responsible stewardship and clear intentionality. We believe that the earlier in the company life-cycle this is made explicit, the greater the chance of positive impact. Active engagement and leveraging all aspects of the Katapult ecosystem supports our investees and cements a multi-stakeholder approach to decision making. We will set the standard for how to operate at the intersection of impact and tech.
